01 Model specification

Flat Scoop in 1.2 mm Grade 304 Stainless Steel with a Nominal 250 g Volumetric Capacity Based on Water Density. Grade 316 Is Available as an Alternative.

02 Technical specifications

PARAMETER	VALUE	UNIT	TECHNICAL NOTE
Capacity (kg)	1	kg	—
Material	Stainless Steel Grade 304	—	The primary material used in the construction of the item. Certain components may be manufactured from different materials.
Material Thickness	1.2	mm	The thickness of the material used for the item's primary construction. The thickness of individual components may vary.

03 Model and supply data

Parent product	A08091 — Stainless Steel Flat Scoops
Typical lead time	5–10 working days
Warranty	12 months

04 Specification notes

Configuration description	The Basterfield A08091(00250) is a flat stainless steel scoop with a nominal 250 g volumetric capacity. It is manufactured from 1.2 mm Grade 304 stainless steel as standard; Grade 316 is available as an alternative on request. The stated capacity is based on the density of water. The mass held when scooping other materials will vary according to their bulk density. The standard lead time is 5–10 working days. The published price excludes VAT.
Short Form Specification	**SPECIFICATION USE** Use this description when specifying this model. Basterfield A08091(00250) flat scoop, nominal 250 g volumetric capacity based on water density, manufactured from 1.2 mm Grade 304 stainless steel. Grade 316 is available as an alternative. Lead time: 5–10 working days.
Detailed specification	• Model: A08091(00250) • Nominal volumetric capacity: 250 g • Capacity basis: Density of water • Standard material: Grade 304 stainless steel • Alternative material: Grade 316 stainless steel on request • Material thickness: 1.2 mm • Lead time: 5–10 working days • Pricing: Excludes VAT

05 Frequently asked questions

What scoop sizes are available?

The published range includes nominal 250 g, 500 g, 1 kg, 2 kg and 5 kg sizes.

How are the stated scoop capacities calculated?

The stated capacities are volumetric and are based on the density of water. The mass of other materials will vary according to their bulk density.

What is the standard material?

The standard scoops are manufactured from 1.2 mm Grade 304 stainless steel.

Is Grade 316 stainless steel available?

Yes. Select Stainless Steel Grade 316 under Material, then choose the required capacity and add the configuration to your quote. Grade 316 pricing is available on request.

What is the lead time?

The standard lead time is 5–10 working days.

Do the displayed prices include VAT?

No. Published prices exclude VAT.
