01 Product description and specification

Product description	Grade 304 stainless steel round scoop for portioning and transferring ingredients, with a handle for controlled scooping and pouring. Manufactured from stainless steel Grade 304, these scoops provide excellent corrosion resistance, making them suited to handling a wide range of ingredients, including dry goods, powders, and liquids. Their round, ergonomic design allows for easy scooping, pouring, and cleaning, while the sturdy stainless steel construction ensures long-lasting performance in commercial kitchens, bakeries, and food processing facilities. The volumetric capacity of each scoop is based on the density of water, ensuring consistency and accuracy when measuring ingredients. Available in five convenient sizes—250g, 500g, 1 kg, 2 kg, and 5 kg—these stainless steel scoops cater to various portioning needs, making them an essential tool for chefs, bakers, and food manufacturers. Robust, reliable, and easy to maintain, these scoops help streamline food handling processes while maintaining the highest hygiene standards.
