Product range	A20210{PSS}	Published catalogue data	14 Sep 2026

01 Product description and specification

Product description	ST Series stainless steel product container with drum handles and a reinforced base rim. Specify the required capacity and optional drop-on lid. Engineered for use in food production, pharmaceutical processing, and general manufacturing, this container is fabricated from 1.2 mm thick stainless steel, available in either Grade 304 or Grade 316 to suit your process requirements. The interior features a seamless, sanitary finish with radiused corners, making it suited to hygiene-sensitive environments and easy to clean with no crevices to trap residue. A reinforced bottom rim ensures structural integrity and keeps the container stable during use. Optional drop-on lids are available for all sizes and are designed to wrap around the rim, effectively reducing the risk of contaminant ingress during storage or transport. • Food processing plants. • Pharmaceutical and laboratory use. • Chemical and hygiene-critical industries. • General industrial processing and materials handling.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield A20210 ST-series product container, 1.2 mm stainless steel in Grade 304 or Grade 316 as selected. Side-mounted drum handles and reinforced bottom rim. Capacity and drop-on lid configuration as selected.
