01 Product description and specification

Product description	200 L Grade 304 stainless steel drum with three internal mixing baffles, reinforcing swages and a lid secured by a band clamp. The Basterfield A26131(3B-112-200) stainless steel Drum 200 L with Three Baffles is a heavy-duty, commercial-grade drum manufactured from Grade 304 stainless steel with a 1.2 mm material thickness, offering excellent corrosion resistance and durability for demanding industrial and hygienic environments. Designed for the storage, handling, and controlled processing of liquids and materials, the drum provides a smooth, easy-to-clean internal surface, making it suitable for applications where hygiene and product integrity are critical. The fitted lid helps protect contents from contamination during storage and transport, ensuring secure containment in production and processing operations. This 200-litre capacity drum incorporates reinforcing swages to enhance structural rigidity and minimise deformation during handling and use, whilst a reinforcing rim at the base provides additional strength and stability. The unit is fitted with three internal stainless steel baffles, manufactured from Grade 304 stainless steel with a 2 mm thickness, specifically designed to optimise internal mixing performance by promoting turbulence and improving product movement during agitation or manual mixing processes. The lid is secured by means of a band clamp with a tightening bolt, ensuring a firm and reliable closure during operation and transport. The A26131(3B-112-200) is well suited to applications requiring enhanced mixing capability, including food processing, chemical preparation, pharmaceutical support, laboratory work, and general manufacturing processes.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield A26131(3B-112-200) drum, 200 L capacity, Grade 304 stainless steel with 1.2 mm body thickness and three internal 2 mm Grade 304 baffles. Reinforcing swages, reinforced base rim and lid secured by a band clamp with tightening bolt.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
A26131(3B-112-200)	Stainless Steel Drum 200L with Three Baffles	Standard configuration

03 Application information

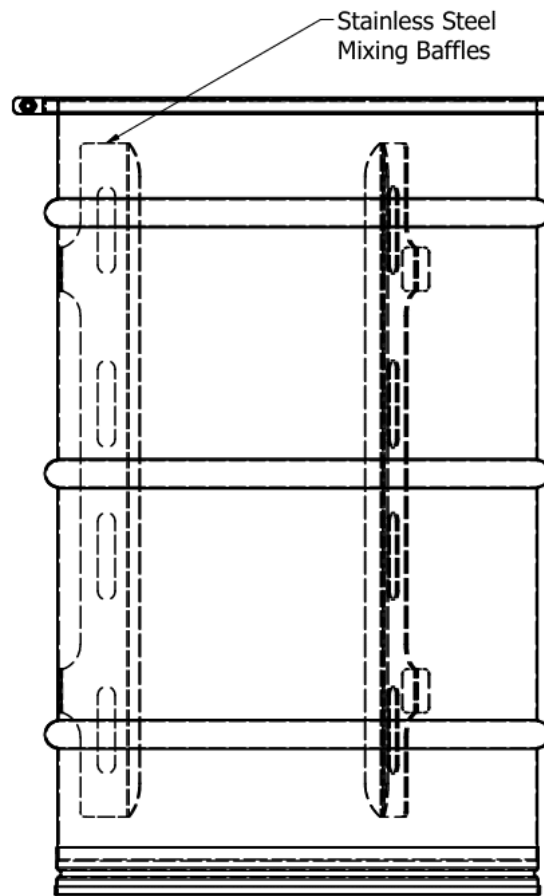

Intended applications	Liquid Storage & Handling
Industries	Food & Beverage Processing, Pharmaceutical Manufacturing, Research Laboratories

Typical lead time	10–15 working days
Warranty	12 months
