## 05 Frequently asked questions

**Which choices identify the required paddle?**

Select Face Style and Length together. The published range offers solid and perforated faces in 900 mm and 1200 mm lengths.

**What is the difference between solid and perforated faces?**

Solid models have an unperforated face. Perforated models have openings in the face. Both use rounded face corners.

**Which material is specified?**

The A66211 mixing paddle range uses Grade 304 stainless steel.

**Where can I find the face dimensions?**

Check the selected item description and specifications for the face dimensions recorded for that configuration, and quote the complete item code when ordering.
