03 Application information

Intended applications	Public Restrooms, Restrooms & Ablutions, Secure Ablutions
Industries	Colleges & Universities, General Manufacturing, Government & Public Sector, Hospitals & Clinics, Prisons & Detention Facilities, Schools

04 Supply and support

Typical lead time	10–15 working days
Warranty	12 months

05 Frequently asked questions

What is included with B17110(L380-DPB)?

The cistern includes the flushing system components, inlet control valve, float control mechanism, straight PVC flush pipe and rubber bung. It also has a stainless steel lid secured with fixing screws. The WC pan is a separate item.

What are the capacity and overall dimensions?

Capacity is 9 litres. Overall dimensions are 408 mm long x 156 mm wide x 258 mm high.

Does top-entry mean the water supply enters the top of the cistern?

No. Top-entry refers to the WC pan flush connection served by the straight flush pipe. The cistern water supply connection is a side inlet.

Which WC pans can use this cistern?

It is intended for compatible top-entry WC pans with exposed flushing connections, including the applicable B17654, B17655, B17657 and B17659 models. Confirm the selected pan, flush pipe alignment and installation layout. Back-entry and integral close-coupled systems use different arrangements.

Can the cistern be purchased separately?

Yes. B17110(L380-DPB) is a standalone product and is also offered as an optional, separately priced accessory on compatible top-entry WC pan models.

Which side is the flush handle on?

The flush handle is on the right as standard. A left-hand handle is available on request and must be specified at the time of order.

What is the material and finish?

The cistern is made from Grade 304 stainless steel with a satin brushed finish.

How is the cistern installed?

It is wall mounted. Coordinate the mounting height, wall support, water supply connection and straight flush pipe with the selected WC pan and the site layout.
