01 Product description and specification

Product description	The B17112 is a wall-mounted, high-level cistern with chain-operated flushing. It is manufactured from fully welded Grade 304 stainless steel and uses concealed wall fixings. An inspection panel provides access through the top of the casing. The inlet and outlet valves can be adjusted to set the flushing volume. The inlet valve can be specified on the left or right. Confirm the required flush pipe and operating arrangement with the selected configuration.
