01 Product description and specification

Product description	The Basterfield stainless steel urinal privacy panel provides separation between adjacent wall-mounted urinals in public and commercial washrooms. Its minimalist design and satin stainless steel finish coordinate with ceramic, stainless steel and other urinal finishes. Manufactured from Grade 304 stainless steel, the panel has fully welded, heavy-duty construction for a durable, vandal-resistant installation. A radiused front edge completes the clean profile. The heavy-duty mounting bracket is concealed after installation. The panel-to-bracket fixings are included, while the installer must select wall anchors suitable for the wall substrate and installation conditions. The panel can be specified for new work or retrofitted alongside existing wall-mounted urinals where the wall and clearances are suitable. Designed and manufactured in South Africa.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield B17810(720x420) wall-mounted urinal privacy panel, 720 mm high x 420 mm projection, manufactured from Grade 304 stainless steel with a satin finish. Fully welded construction with a radiused front edge and heavy-duty concealed mounting bracket. Panel-to-bracket fixings are included; substrate-specific wall anchors are excluded. Designed and manufactured in South Africa.

02 Models and configurations
