01 Product description and specification

Product description	The Basterfield B22326(WFP) Mini Surgeon Scrub-up Sink provides a compact handwashing point for clinics, hospital wards and veterinary facilities. The wall-mounted unit measures 665 mm long x 554 mm wide with a depth of 260 mm. Its wall-mounted layout keeps the floor beneath the sink clear, making it a practical choice where space and access for cleaning matter. Manufactured from 1.2 mm Grade 304 (18/10) stainless steel, the sink provides a durable, non-porous surface that is easy to clean. The pressed bowl measures 525 x 425 mm and is 260 mm deep, providing a generous washing area within the compact format. A 300 mm high integral splashback helps protect the wall behind the sink. Tap holes in the splashback accommodate a medical elbow-action mixer, allowing the tap arrangement to be specified for the installation. The unit incorporates a waste outlet and is supplied with heavy-duty mounting brackets, a hinged grate and rubber bumpers. Confirm the required mixer and plumbing connections when requesting a quotation.
