04 Specification notes

Configuration description

The B22335 is a 1600 mm long, 600 mm deep combination slop hopper and wash basin for healthcare and institutional sluice rooms. Grade 304 stainless steel construction, smoothly ground welds and a satin-polished finish provide a surface that can be cleaned between uses.

The conical slop hopper has a continuous flushing rim. The adjacent hand wash basin has a 40 mm outlet. A high-level cistern with a pull-rod flush mechanism is supplied.

Choose left-hand or right-hand cistern orientation to suit the room and plumbing layout. The cistern and slop hopper are positioned on the same selected side.

The bucket grid and front support legs are separate configuration choices. A selected bucket grid is hinged over the hopper, has rubber bumpers and lifts through 90 degrees for access. Select front support legs where that support arrangement is required by the installation. Check the selected Yes or No values for both options before requesting a quotation.

This configuration has a right-hand cistern. The bucket grid and front support legs are not included.

Short Form Specification

SPECIFICATION USE
Use this description when specifying this model.

Basterfield B22335(112-1600-HLC). Grade 304 stainless steel combination slop hopper and wash basin, 1600 mm long and 600 mm deep, pressed and welded construction, smoothly ground welds and satin-polished finish. Conical hopper with continuous flushing rim; wash basin with 40 mm outlet; high-level cistern with pull-rod flush. Cistern orientation, hinged bucket grid and front support legs as selected. Selected configuration: right-hand cistern; no bucket grid; no front support legs.

Detailed specification

- Model: B22335(RT-112-1600-HLC)
- Material: Stainless Steel Grade 304
- Overall Length: 1600 mm
- Overall Depth: 600 mm
- Finish: Satin Polished
- Cistern Orientation: Right Hand
- Flush: High-Level Cistern with Pull Rod
- Wash Basin Outlet: 40 mm
- Bucket Grid: Not Included
- Front Support Legs: Not Included

05 Frequently asked questions

What is supplied with the unit?

The combination slop hopper and wash basin is supplied with a high-level cistern and pull-rod flush mechanism. A bucket grid and front support legs are included only when selected in the configuration.

Can I choose the cistern and hopper side?

Yes. Choose Left Hand or Right Hand under Cistern Orientation. The cistern and slop hopper are on the same selected side; match the configuration to the room and plumbing layout.

How do I select the bucket grid and support legs?

Choose Yes or No separately for Bucket Grid and Front Support Legs. Selecting one does not automatically include the other. The selected configuration identifies what is included.

What does the optional bucket grid do?

The stainless steel grid is hinged over the hopper, has rubber bumpers and lifts through 90 degrees to give access to the hopper.
