05 Frequently asked questions

What configuration choices are available?

Select the length, 1.2mm or 1.5mm material thickness, left- or right-hand bowl and whether front support legs are required.

How are plaster residues collected?

The bowl discharges into a cylindrical residue trap fitted with a stainless steel lid and removable strainer. The trap collects plaster residues before wastewater reaches the downstream drainage connection.

Are front support legs included?

Front support legs are a configuration option. Select a version with front support legs if they are required; the selected item description states the support arrangement.
