| B22430 | <p>Introducing our B22430 Bath Built-In Type, specifically designed to meet the high standards required in hospital and institutional environments. This bath is constructed with precision and is built to withstand the most arduous use, making it a reliable and long-lasting choice for your facility.</p> <p>Our bath is manufactured from grade 304 stainless steel, which has a thickness of 1.5mm, ensuring both durability and hygiene. The use of high-quality materials guarantees that our bath is resistant to rust, corrosion, and other forms of degradation, making it an excellent investment for any facility.</p> <p>In addition, the internal corners of our bath are radiused, and the straight back support is ergonomically designed to provide maximum comfort and support to users. These features are essential in ensuring the safety and well-being of patients and staff alike.</p> <p>We take pride in the quality of our products, and our stainless steel bath is no exception. It features a welded construction that creates a seamless and robust structure that can withstand years of heavy use. All welds are ground smooth and polished to a satin finish, giving our bath a sleek and professional appearance that is easy to maintain.</p> <p>Our stainless steel bath is also designed for built-in installation into brick and mortar, ensuring a secure and stable fit. This feature makes it an ideal choice for facilities that require a permanent and reliable solution for their bathing needs.</p> <p>In conclusion, our stainless steel bath is the perfect choice for hospitals and institutional environments that require high-quality and durable bathing equipment. With our commitment to quality and attention to detail, you can be assured that our bath will meet and exceed your expectations.</p> | Standard configuration  |
