01 Product description and specification

Product description

The Basterfield B30840(S) is a large single-compartment PPE dispenser manufactured from Grade 304 stainless steel. Its single compartment provides one defined location for a selected PPE type. Position it where staff collect personal protective equipment before entering the work area.

Overall dimensions are 250 mm length x 170 mm width x 220 mm height. A hinged lid provides access for replenishing supplies, and keyhole slots provide the wall mounting points. Allow room to open the lid and select wall fixings to suit the support surface.

Suitable contents may include disposable hair nets, beard covers, face masks or shoe covers, depending on the item size, packaging and workplace dispensing procedure. Check the fit of the intended supplies before ordering; overall dimensions do not specify the usable internal capacity.

Applications include PPE issue points, changing and locker rooms, production-area entrances, laboratory support spaces and pharmaceutical support areas. Typical settings include food-processing and packing premises, hospitals and care facilities, clinical and research laboratories, veterinary facilities, manufacturing workplaces and catering operations. In hotels and restaurants, locate the dispenser where kitchen or housekeeping staff collect the PPE specified for their tasks.

Check and replenish stock as part of the site routine. Clean the dispenser using products and methods suitable for Grade 304 stainless steel and the PPE storage procedure.

The B30840 large range provides one, two, three or four compartments at respective lengths of 250, 500, 750 and 1000 mm. All four supplied models are 170 mm wide and 220 mm high. Choose by the number of PPE types to separate and the available wall space.

Short Form Specification

SPECIFICATION USE

Use this description when specifying this product range.

Basterfield B30840(S) large single-compartment PPE dispenser, Grade 304 stainless steel, 250 mm (L) x 170 mm (W) x 220 mm (H) overall. Provide one compartment, a hinged refill lid and keyhole slots for wall mounting. Allow lid-opening clearance and select fixings for the mounting surface.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
