01 Product description and specification

Product description

Cleaner’s wash trough for washing equipment and carrying out general cleaning tasks in commercial and institutional facilities.

The stainless steel contractor’s trough is perfectly suited for areas where high volume cleaning is required such as educational institutions, workshops, buildings, public amenities and factories. The unit features a 300 mm deep trough to enable easy rinsing of dirty mops and a splashback to the rear to ensure the washroom remains clean and hygienic. The splashback is optionally available with an extended length. Manufactured from stainless steel, the trough features numerous designs to ensure maximum hygiene. Within the wash trough, all vertical and horizontal corners feature a radius cove preventing the build-up of dirt. The brushed stainless steel finish is easy to clean and maintain with dirty surfaces needing a simple wipe to clean. The contractor’s wash trough is fully welded resulting in no joints or crevices for the build-up of grease and grime. All of these features combine to result in a very sanitary and easy to maintain contractor’s wash trough.

Manufactured to offer cleaner’s with a heavy-duty and long-lasting basin, the unit can withstand significant wear and tear. The contractor’s wash basin can also be easily secured to the wall with heavy duty wall mounting brackets. Where extra support is required, optional front support legs can be supplied to support the unit in addition to the heavy duty wall mounting brackets. Featuring an integral tap landing, the contractor’s wash trough basin is suitable for use with deck mounted tapware such as pillar taps.

Construction and features

- stainless steel wall mounted contractor’s wash trough.
- Fully welded construction with no joints or crevices preventing the build-up of deposits ensuring a very hygienic unit.
- Manufactured from stainless steel making the contractor’s wash trough extremely easy to clean and low on ongoing maintenance.
- The brushed stainless steel finish results in a very aesthetic unit within any washroom.
- Features a 300 mm deep trough allowing for efficient cleaning of mops.
- All horizontal and vertical corners feature a radius cove making cleaning of the trough easy and hassle-free.
- Manufactured with a standard 40 mm waste outlet hole in the bottom of the trough.
- The contractor’s sink features a tap landing suitable for deck mounted tapware including pillar taps.
- Manufactured with an integral splashback ensuring the washroom area is kept clean.
- Extended splashback available as an optional customisation.
- The contractor’s trough sink is easily fixed to the wall with heavy-duty wall-mounting gallows brackets.
- The unit can be supplied with optional front support legs where required.
