01 Product description and specification

Product description

Large format 2250mm double-bowl utensil wash sink in 1.5mm Grade 304 stainless steel, with two 1000 × 990 × 500mm bowls and a choice of integral splashback heights.

Short Form Specification

SPECIFICATION USE
Use this description when specifying this product range.

Large format 2250mm double-centre utensil wash sink; 1.5mm Grade 304 stainless steel; two bowls, each 1000mm (L) × 990mm (W) × 500mm (D); Ø90mm pre-punched hole in each bowl; integral splashback heights 300/500/800/1000mm. Overhead pre-rinse spray and waste fittings optional, supplied separately.

02 Technical specifications

PARAMETER	VALUE	UNIT	TECHNICAL NOTE
Material	Stainless Steel Grade 304	–	The primary material used in the construction of the item. Certain components may be manufactured from different materials.
Material Thickness	1.5	mm	The thickness of the material used for the item's primary construction. The thickness of individual components may vary.
Length	2250	mm	The length of the item typically as measured from left to right.
Number of Bowls	2	–	–
Bowl Orientation	Centre	–	–

02 Technical specifications

PARAMETER	VALUE	UNIT	TECHNICAL NOTE
Bowl Length	1000	mm	The length of the bowl typically as measured from left to right.
Bowl Width	990	mm	–
Bowl Depth	500	mm	–
Waste Outlet Hole	Ø90mm pre-punched hole	–	–

03 Configuration options

Splashback Height	300 mm; 500 mm; 800 mm; 1000 mm

Options vary by model; not every combination is available. Use the product page to select a model.

04 Functional features

01 Large Format Utensil Washing
A 2250mm-long sink with two large bowls provides space for washing oversized pots, trays and utensils in commercial kitchens and food processing wash areas.

02 Two Deep Centre Bowls
Each bowl measures 1000mm (L) × 990mm (W) × 500mm (D), providing separate spaces for washing and rinsing large cookware and utensils.

03 1.5mm Grade 304 Stainless Steel
The sink is manufactured from 1.5mm Grade 304 stainless steel for commercial utensil washing.

04 Integral Splashback Options
Choose a 300mm, 500mm, 800mm or 1000mm-high integral splashback. Each model is supplied as a complete sink with its splashback.

05 Ø90mm Pre-Punched Waste Holes
Each bowl has a Ø90mm pre-punched hole. The 90mm basket strainer waste fittings are optional and supplied separately, with two recommended per double-bowl sink.

06 Optional Overhead Pre-Rinse Spray
An overhead pre-rinse spray with mixer taps is available separately. Confirm the mounting position, water supplies and spray reach for the installation.

05 Application information

Intended applications	Pot Washing, Utensil & Tray Washing
Industries	Bakeries, Food & Beverage Processing, Hotels & Lodges, Institutional & Contract Catering, Restaurants & Cafés

06 Supply and support

Typical lead time	10–15 working days
Warranty	24 months

07 Frequently asked questions

What makes this a large format sink?

The sink is 2250mm long and has two bowls, each 1000mm (L) × 990mm (W) × 500mm (D). This provides space for washing large pots, trays and utensils. Check the dimensions of the articles being washed against the bowl dimensions.

What material and thickness are used?

The B37355(DC-E) range is manufactured from 1.5mm Grade 304 stainless steel. The material and thickness are listed in the attributes for every splashback variant.

Which integral splashback heights are available?

Choose 300mm, 500mm, 800mm or 1000mm. Each option is a complete sink with an integral splashback. Splashback height is measured above the working surface and is not the overall sink height.

Does the sink include 90mm waste fittings?

Each bowl is supplied with a Ø90mm pre-punched hole. The hole diameter describes the opening in the bowl, not the downstream pipe connection. The 90mm basket strainer waste fitting, item 04PF-PLUM-038055, is optional and supplied separately. Select two fittings for the double-bowl sink, one per bowl.

Can I add an overhead pre-rinse spray?

Yes. Item 04TM-PRS0001 is an optional overhead pre-rinse spray with mixer taps. One assembly is recommended per sink where required. Confirm the mounting position, water supplies, installation clearances and spray reach for both bowls.

Where is this large format sink used?

It is intended for pot, tray and utensil washing in commercial kitchens, bakeries, institutional catering facilities and food processing wash areas where larger articles need room for manual cleaning.

What should be checked before ordering?

Confirm the splashback height, access route, installation space and the dimensions of the largest articles to be washed. Plan installation space and service access for the selected sink, and coordinate the optional spray, waste fittings and site drainage connections.
