01 Product description and specification

Product description

Single-station Wudhu Khana ablutions bath for dedicated washing areas in prayer and ablution facilities.

These self-contained, prefabricated units can be inconspicuously joined together to create a seamless and efficient wudhu area.

Each unit includes an integral footrest for comfortable use, a wastewater drain channel to improve hygiene, and individual tap mounting assemblies for convenience. The plumbing system is neatly housed in specially designed mounting boxes behind the tap spout, allowing easy maintenance access via a removable cover panel. Various tap options are available, including traditional and high-tech automatic models that enable hands-free operation and water conservation.

Construction and features

- Traditional seated wudu position for comfort.
- Individual drainage system for improved sanitation.
- Sturdy stainless steel construction for lifelong service.
- Pre-fabricated components minimize installation time.
- Plumbing mounting boxes simplify maintenance.
- Integrated plaster or tiling key for seamless wall finishing.

Options and Accessories (Available at Additional Cost):

- Standard tap assembly.
- Automatic tap assembly for hands-free operation.

Available Spares and Services:

- Replacement valves.
- Replacement spouts.

The B40380 Wudhu Khana Ablutions Bath is available in various station lengths to suit different space and capacity requirements, making it an adaptable and practical choice for any communal ablution facility.

Short Form Specification
