01 Product description and specification

Product description	The B52673 walk-through boot disinfection bath provides a defined footwear treatment point between changing rooms and production areas. The bath and supporting frame are manufactured from fully welded Grade 304 stainless steel. Removable, slip-resistant floor panels are recessed into the bath, allowing the soles of footwear to contact the disinfectant. A bottom waste outlet allows the bath to be drained for cleaning and solution replacement. Adjustable feet allow the floor-mounted unit to be levelled. Select the required width and arrange the station to suit the site's footwear cleaning and disinfection procedure.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield B52673. Fully welded Grade 304 stainless steel boot disinfection bath and frame; recessed removable floor panels; bottom drainage outlet; adjustable feet. Walkway and handrail configurations as selected.
