01 Product description and specification

Product description	Stainless steel security shower seat for correctional and institutional shower installations. The secure penal-ware shower seat is an essential facility in high-security environments, such as prisons and detention cells. Construction & material: The unit is constructed using welded Grade 304 stainless steel, recognized for its strength, corrosion resistance, and excellent hygiene properties. The entire seat is fabricated from 3 mm thick steel sheeting, ensuring its long-lasting resilience in high-usage environments. Design: It is fitted with perforations, each 10 mm in diameter and spaced 20 mm apart, providing efficient drainage and preventing water pooling. Dimensions: The overall dimensions of the unit are 450 mm (width) x 420 mm (height) and available in different lengths, ensuring an ergonomic design that can accommodate a variety of users. Mounting: The unit is securely affixed to the wall using gallows brackets, each 4.5 mm thick. Each bracket is predrilled with 2 x 12 mm mounting holes for robust, secure installation. Construction and features Durable welded construction: welded construction for strength, ensuring a long service life and preventing potential damage or breakage. Hygienic material: the unit is fabricated from Grade 304 stainless steel. Efficient drainage: perforations provide excellent water drainage, preventing water build-up and maintaining hygiene. Secure installation: gallows brackets with pre-drilled mounting holes ensure a robust, secure installation to the wall, supporting consistent use without compromise on security or stability. Application: The secure penal-ware shower seat is suitable for use in prisons, holding cells, and similar applications, where robustness, security, and durability are crucial requirements. Designed and manufactured in South Africa.

**SECURITY SHOWER SEAT WITH
GALLOWES BRACKETS AND DRAINAGE
PERFORATIONS****Product overview:**

The secure penal-ware shower seat is an essential facility in high-security environments, such as prisons and detention cells. Specifically designed for these applications, it guarantees safety, hygiene, and durability.

Construction & material:

The unit is constructed using welded grade 304 stainless steel, recognized for its strength, corrosion resistance, and excellent hygiene properties. The entire seat is fabricated from 3mm thick steel sheeting, ensuring its long-lasting resilience in high-usage environments.

Design:

The shower seat is designed with a 50mm downturn for added comfort and safety. It is fitted with perforations, each 10mm in diameter and spaced 20mm apart, providing efficient drainage and preventing water pooling.

Dimensions:

The overall dimensions of the unit are 450mm (width) x 420mm (height) and available in different lengths, ensuring an ergonomic design that can accommodate a variety of users.

Mounting:

The unit is securely affixed to the wall using gallows brackets, each 4.5mm thick. Each bracket is predrilled with 2 x 12mm mounting holes for robust, secure installation.

Features:

Durable welded construction: welded construction for strength, ensuring a long service life and preventing potential damage or breakage.

Hygienic material: the unit is fabricated from grade 304 stainless steel. This material is non-porous and easy to clean, aiding in the prevention of bacterial growth and facilitating a healthier environment.

Efficient drainage: perforations provide excellent water drainage, preventing water build-up and maintaining hygiene.
