01 Product description and specification

Product description

The Basterfield B60120 combines a large cleaning bowl and a separate hand wash basin in one heavy-duty Grade 304 stainless steel janitorial unit. It measures 600 mm long x 700 mm deep, front to back, x 850 mm high.

The large bowl provides a dedicated point for washing buckets and cleaning equipment. A hinged grid provides support over the cleaning bowl and lifts for access. The separate hand wash basin provides a handwashing point within the same unit. Both bowls have 40 mm waste outlets. The unit is supported on legs and fitted with protective rubber bumpers.

Use the unit in janitorial and housekeeping rooms, healthcare utility rooms and cleaning support areas at hotels, catering premises, hospitals, care facilities, schools, laundries, food-processing premises, factories and public buildings. Keep handwashing and equipment-cleaning tasks separate in accordance with the facility workflow.

Allow space to raise the grid, position and handle buckets and clean around the unit. Confirm the water supply fittings, waste connections and the installation arrangement for the site. Clean the bowls, grid and surrounding surfaces using products and methods suitable for Grade 304 stainless steel and the facility cleaning procedure.

Short Form Specification

SPECIFICATION USE

Use this description when specifying this product range.

Basterfield B60120 heavy-duty Grade 304 stainless steel janitorial sink, 600 mm length x 700 mm front-to-back depth x 850 mm height. Supplied with large cleaning bowl, hinged grid, separate hand wash basin, 40 mm waste outlets, supporting legs and protective rubber bumpers.
