01 Product description and specification

Product description	Boot cleaner for removing dirt from footwear at changing-room and production-area entrances. Manufactured from 304-grade stainless steel, this cleaner is built for durability, corrosion resistance, and long-term use in dry zones where water access is not available or required. The unit features three strategically placed heavy-duty brushes that effectively clean the sole and sides of boots, removing grit, dirt, and contaminants. Designed for simplicity and efficiency, it operates manually and does not require any integrated water supply. To support ease of maintenance, the unit includes side-access holes that allow for quick screwdriver insertion, enabling simple removal and replacement of the brushes. Spare brushes are available on an ongoing basis, ensuring long-term usability. With a footprint of just 350 mm x 250 mm and a height of 155 mm, the B65005 is suited to narrow or space-constrained hygiene zones. The unit mounts securely to the floor via pre-punched 8 mm holes in the provided stainless steel base plates, ensuring stability during use. This unit is suited to facilities that require durable, easy-to-maintain cleaning equipment without the complexity of plumbing or moving parts.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield B65005. Boot Cleaner. Manufactured from 304-grade stainless steel, this cleaner is built for durability, corrosion resistance, and long-term use in dry zones where water access is not available or required. With a footprint of just 350 mm x 250 mm and a height of 155 mm, the B65005 is suited to narrow or space-constrained hygiene zones.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
B65005(G)	BOOT CLEANER WITH SIDE AND SOLE BRUSHES AND GRATING PANEL MOUNTING TO B65005G(PSS)	Standard configuration

03 Application information

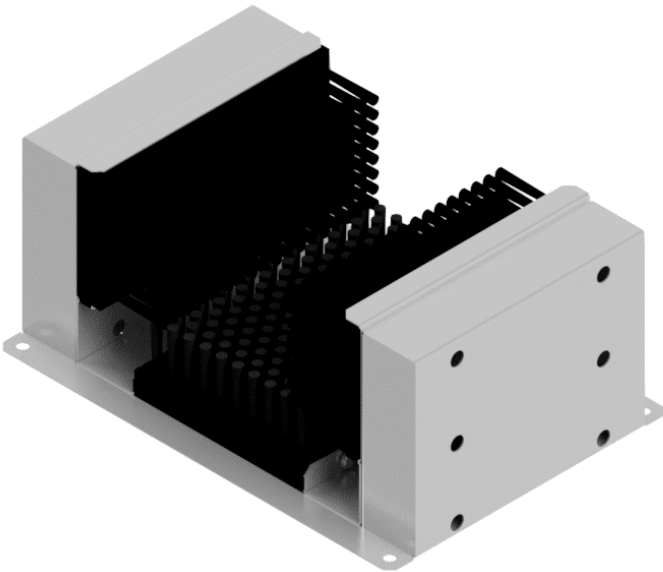

Intended applications	Footwear Cleaning and Disinfection
Industries	Food & Beverage Processing, Meat & Poultry Processing, Pharmaceutical Manufacturing, Research Laboratories

04 Supply and support

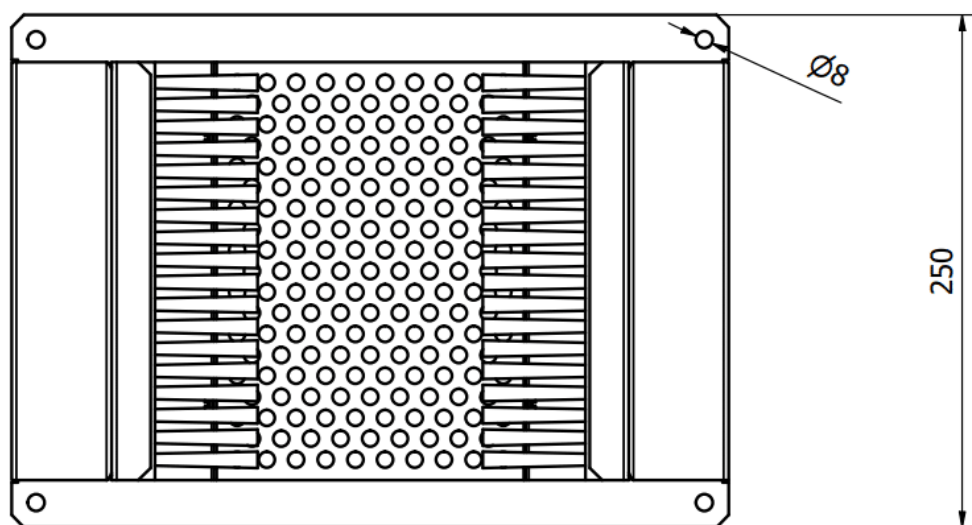

Typical lead time	10–15 working days
-------------------	--------------------

Warranty	12 months
