01 Product description and specification

Product description

Single-station Grade 304 stainless steel boot wash unit with a water-fed hand brush, foot-operated valve and centre waste outlet. Assembly with brush stored: 499 mm across × 556 mm front-to-back × 869 mm high, excluding the flexible hose and working clearance. Tray: 400 × 492 mm; rim height: 299 mm front, 397 mm rear, at the foot setting shown. Adjustable feet; ½″ BSP water inlet and 1½″ BSPT waste outlet.

Short Form Specification

SPECIFICATION USE
Use this description when specifying this product range.

Basterfield B65145 single-station manual boot wash unit, specification reference B65145(PSS). Grade 304 stainless steel construction. Assembly with the brush in its holder: 499 mm (L, across the front view) × 556 mm (W, front-to-back) × 869 mm (H), excluding the flexible hose loop and working clearance. Tray: 400 mm across × 492 mm front-to-back. Rim heights above floor: 299 mm front and 397 mm rear. Foot centres: 337 mm across × 427 mm front-to-back. Heights are at the levelling-foot setting shown in the GA drawings. Complete with hand-held water-fed scrubbing brush, foot-operated water valve, drainage enclosure with centre waste outlet, and adjustable levelling feet. Water inlet connection: ½″ BSP. Centre waste outlet connection: 1½″ BSPT. Provide suitable water and waste services and additional space for the hose, user and cleaning access.

02 Functional features

01 Grade 304 stainless steel

Stainless steel construction provides a durable framework with surfaces that can be cleaned as part of routine wash-area housekeeping.

02 Foot-operated water control

A foot-operated valve activates the water supply while the user guides the scrubbing brush by hand. The water inlet connection is ½″ BSP.

03 Water-fed hand brush

The hand-held brush combines manual scrubbing with water delivery, allowing the user to work on areas of the boot that need attention.

04 Compact single-station layout

The tray measures 400 × 492 mm. With the brush in its holder, the dimensioned assembly spans 499 mm across × 556 mm front-to-back × 869 mm high at the foot setting shown. Allow additional space for the flexible hose, user and cleaning access.

05 Centre waste outlet

The drainage enclosure collects wash water and directs it to a centre 1½″ BSPT waste outlet connection.

06 Adjustable levelling feet

Adjustable feet allow the boot wash unit to be levelled on the floor during installation.

03 Application information

Intended applications	Change Rooms & Locker Rooms, Footwear Cleaning and Disinfection
Industries	Dairy & Beverage Processing, Fish & Seafood Processing, Food & Beverage Processing, Fresh Produce & Packhouses, Meat & Poultry Processing

04 Supply and support

Typical lead time	10–15 working days
Warranty	12 months

06 Frequently asked questions

How is the B65145 operated?

Move the water-fed hand brush over the boot to scrub it, and activate the water supply with the foot-operated valve. The brush is operated manually.

What are the dimensions and outlet position?

With the brush in its holder, the dimensioned assembly is 499 mm across × 556 mm front-to-back × 869 mm high, excluding the flexible hose loop and working clearance. The tray is 400 mm across × 492 mm front-to-back, with rim heights of 299 mm at the front and 397 mm at the rear. Foot centres are 337 mm across × 427 mm front-to-back. Heights reflect the levelling-foot setting shown on the GA drawings. The centre waste outlet has a 1½″ BSPT connection. Specification reference: B65145(PSS).

What material is the unit made from?

The boot wash unit is manufactured from Grade 304 stainless steel and is supported on adjustable levelling feet.

What services and space should be allowed for installation?

Provide a water supply for the ½″ BSP water inlet connection and a suitable waste connection for the centre 1½″ BSPT waste outlet. Allow working space for the user and access for cleaning. Plan the water supply, drainage route and installation layout before ordering.

Where can the B65145 be used?

The B65145 can provide a manual boot-washing point for butcheries, abattoirs, poultry processors, fruit and vegetable packhouses, dairies, and fish and seafood processors where wet footwear cleaning forms part of the site procedure. Typical locations include changing-room entrances and entrances to processing, preparation and packing areas. Provide a suitable water supply, waste connection and working space.

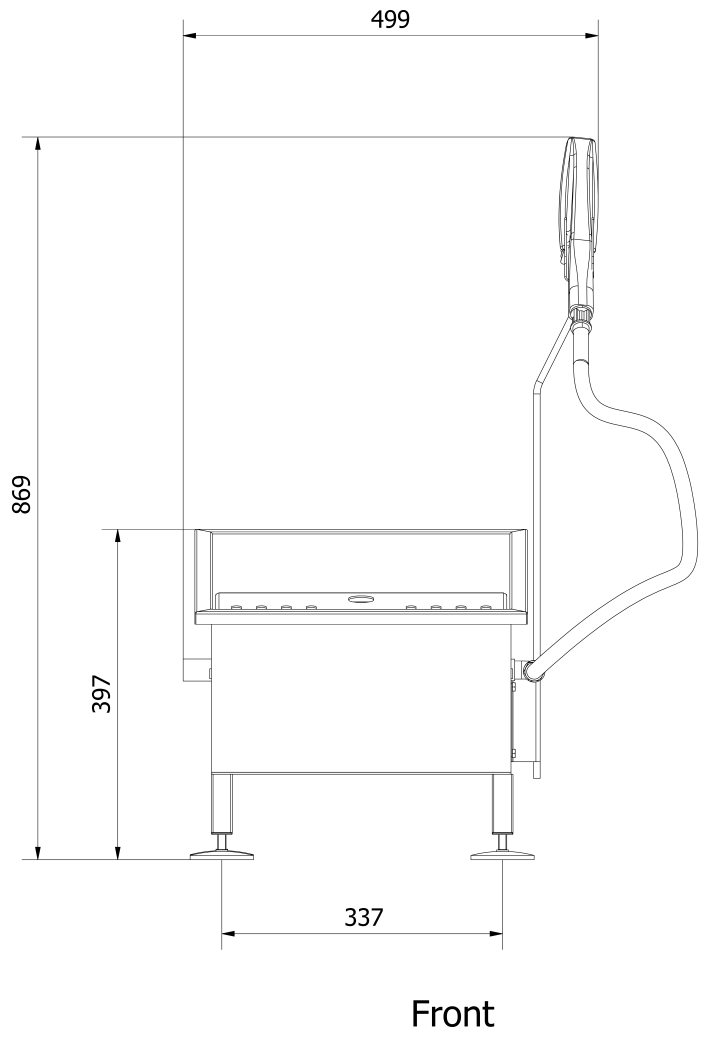

Does washing boots with this unit disinfect them?

The unit supports physical cleaning by scrubbing and rinsing. Disinfection, where required, needs a separate, defined site procedure with suitable products and contact times; it is not established by washing alone.

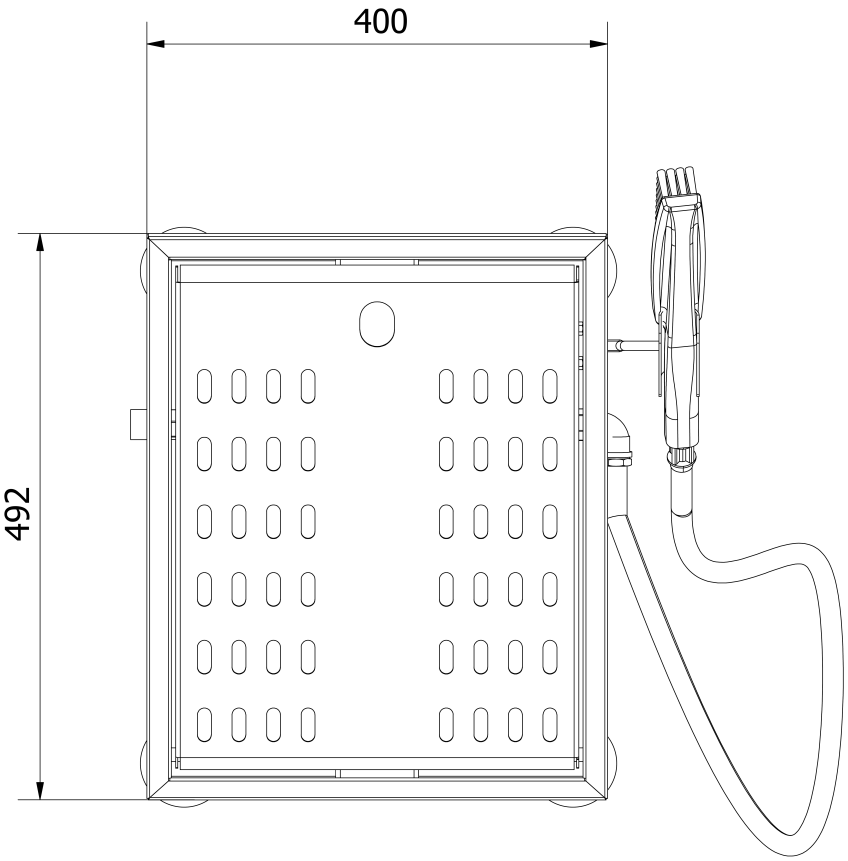

How should the unit be cleaned and maintained?

Include the stainless steel body, brush, drainage enclosure and waste outlet in the site's routine cleaning schedule. Remove accumulated dirt, keep the outlet clear and inspect the brush, hose and foot valve for wear or leaks.
