01 Product description and specification

Product description

The Basterfield B65210(R) is a wall-mounted automatic boot scrubber manufactured in South Africa. Its motorised brushware cleans boot soles and sides at a single wet washing station, suited to changing-room and production entrances where floor space is limited.

The Grade 304 stainless steel construction and wall-mounted layout provide access for cleaning underneath the unit. Overall dimensions are approximately 600 mm long x 300 mm wide x 1100 mm high.

Solenoid-controlled water flow and an inline venturi dosing system apply water and cleaning solution during brushing. A threaded stainless steel waste outlet connects the wash enclosure to drainage. Available in either 220 V single-phase or 380 V three-phase. Specify the required supply when requesting a quotation. Each unit is supplied for the chosen electrical supply. Confirm the installation services and mounting support before ordering.

Use this motorised boot washer when users can clean their footwear one person at a time. For a walk-through route, compare B65250 for compact sole and side brushing or B65450 for sole, side and upper-boot brushing. Automatic describes the powered scrubbing and dosing functions; confirm the required start and control arrangement in your quotation.

Boot scrubbing removes dirt and residues. Where disinfection is required, use a site-approved chemical, concentration and contact-time procedure; the machine alone does not establish a validated disinfection process.

Request a quotation from Basterfield with your site location, number of users at peak shift change, available floor space, footwear type and electrical, water and drainage services. Confirm the selected configuration and delivery requirements in the quotation.

Short Form Specification

SPECIFICATION USE

Use this description when specifying this product range.

Basterfield B65210(R) single-station wall-mounted motorised boot scrubber, Grade 304 stainless steel. Approximate overall dimensions 600 × 300 × 1100 mm. Available in either 220 V single-phase or 380 V three-phase. Specify the required supply when requesting a quotation. Each unit is supplied for the chosen electrical supply.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
B65210(R)	Single Boot Scrubber Motorised, 380 V Three-Phase.	Electrical Supply Option: 380 V three-phase
B65210(R)-220	Single Boot Scrubber Motorised, 220 V Single-Phase.	Electrical Supply Option: 220 V single-phase

03 Application information

Intended applications	Footwear Cleaning and Disinfection
Industries	Food & Beverage Processing, Meat & Poultry Processing

04 Supply and support

Typical lead time	10–15 working days
Warranty	12 months

VERIFICATION REQUIRED Published values are provided for initial specification. Confirm the selected model, critical dimensions, site services, clearances, and the latest document revision with Basterfield before procurement, manufacture, or installation. E&OE.
