Detailed specification

- Model: B65250(R380-C100)
- Electrical supply: 380 V three-phase
- Material: Grade 304 stainless steel
- Length: 1060 mm
- Sole and lower-side brushes
- Solenoid valve activation
- Automated soap dosing

05 Frequently asked questions

What does this automatic walk-through boot scrubber clean?

B65250 has three motorised brushes for cleaning the soles and sides of boots with water and cleaning solution. Compare B65450 if upper-boot brushing is required.

Where can the compact boot washer be used?

Use it at footwear-cleaning entrances in food-processing facilities, abattoirs and changing rooms where a wet walk-through cleaning route is appropriate.

What should I confirm before installation?

Choose 220 V single-phase or 380 V three-phase and specify the required supply when requesting a quotation. Confirm the dimensions, activation method, water inlet and drainage details. Allow clear entry and exit space, cleaning access and time for the site footwear-cleaning procedure.

How many people can pass through the unit?

Plan capacity using the number of people arriving together and the brushing time required by your site procedure. Ask Basterfield to review the entry layout and selected configuration when requesting a quotation.

Is this boot scrubber manufactured in South Africa?

Yes. Basterfield manufactures B65250 in South Africa. Request a quotation directly with the quantity, site location and required configuration.

Which electrical supply options are available?

Available in either 220 V single-phase or 380 V three-phase. Specify the required supply when requesting a quotation. Each unit is supplied for the chosen electrical supply.
