04 Specification notes

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Configuration description | <p>Basterfield B65852(V1-220) is the 220 V compact walk-through dry boot scrubber for construction sites, mines and industrial workplaces. It removes dirt from boot soles and sides using two motorised brushes.</p> <p>The powder-coated mild-steel frame measures 1560 mm long x 790 mm wide x 1511 mm high. A push button activates the brushes, each driven by its own motor and gearbox. Tool-free brush removal supports cleaning and maintenance, and adjustable feet allow levelling.</p> <p>Operate dry, without added water, detergent or sanitising fluid. This model is not a food-hygiene boot washer or disinfection station and is unsuitable for wet washing. Manufactured in South Africa.</p> |
