01 Product description and specification

Product description

The Basterfield B65852 is a compact walk-through dry boot scrubber for construction sites, mines and industrial workplaces. It removes dirt from boot soles and sides as personnel move between work areas.

The frame is manufactured from powder-coated mild steel. A push button activates two scrubbing brushes, each driven by its own motor and gearbox. The brushes can be removed without tools for cleaning and maintenance, and adjustable feet allow the unit to be levelled during installation.

Both models measure 1560 mm long × 790 mm wide × 1511 mm high. B65852(V1-220) is the 220 V model and B65852(V1-380) is the 380 V model. Select the voltage that matches the specified site supply.

This unit operates dry, without added water, detergents or sanitising fluids. Its coated mild-steel construction and dry cleaning method are intended for industrial dirt removal. It is not a food-hygiene boot washer or a disinfection station and is unsuitable for wet washing.

Manufactured in South Africa.

Selecting an industrial boot scrubber
For construction-site and mining entrances, select B65852 when dry brushing is appropriate and match the voltage option to the site supply. This electric boot scrubber starts by push button; it does not require a water or drainage connection for dry operation. Compare B65220(RD-520) for another motorised dry sole-and-side brush arrangement.

Request a quotation directly from Basterfield with the required voltage model, quantity, site location, available space and expected footwear dirt. For food-processing entrances that need wet washing and chemical dosing, compare the separate B65230, B65250 and B65450 boot-washer ranges.

Short Form Specification

SPECIFICATION USE

Use this description when specifying this product range.

Basterfield B65852 compact walk-through dry boot scrubber with powder-coated mild-steel frame, sole and side scrubbing brushes, individual motor and gearbox drives, push-button activation, tool-free brush removal and adjustable feet. Overall dimensions: 1560 x 790 x 1511 mm (L x W x H). Select 220 V or 380 V. For construction, mining and industrial dirt removal. Dry operation only; not for food-hygiene duties, wet washing or disinfection.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
B65852(V1-220)	B65852(V1-220) Compact Walk-Through Dry Boot Scrubber, 220 V, 1560 x 790 x 1511 mm (L x W x H), with Sole and Side Brushes and Powder-Coated Mild-Steel Frame. For Construction, Mining and Industrial Dirt Removal. Dry Use Only; Not for Food Hygiene or Disinfection.	Electrical Supply Option: 220 V Overall dimensions: 1560 x 790 x 1511 mm (L x W x H)
B65852(V1-380)	B65852(V1-380) Compact Walk-Through Dry Boot Scrubber, 380 V, 1560 x 790 x 1511 mm (L x W x H), with Sole and Side Brushes and Powder-Coated Mild-Steel Frame. For Construction, Mining and Industrial Dirt Removal. Dry Use Only; Not for Food Hygiene or Disinfection.	Electrical Supply Option: 380 V Overall dimensions: 1560 x 790 x 1511 mm (L x W x H)

03 Functional features

01	Powder-coated mild-steel frame Coated mild-steel construction for construction, mining and industrial workplaces.
02	Sole and side scrubbing Two motorised brushes remove dirt from boot soles and sides.
03	Dry operation Operates without added water or cleaning fluids for industrial dirt removal.
04	Push-button activation A push button starts the motorised brush operation.
05	Individual brush drives Each brush is driven by its own motor and gearbox.
06	Tool-free brush removal Brushes can be removed without tools for cleaning and maintenance.
07	Adjustable feet Feet allow the unit to be levelled during installation.

04 Application information

Intended applications	Dry Footwear Cleaning
Industries	Construction, General Manufacturing, Mining & Quarrying

05 Supply and support

Typical lead time	10–15 working days
Warranty	12 months

VERIFICATION REQUIRED Published values are provided for initial specification. Confirm the selected model, critical dimensions, site services, clearances, and the latest document revision with Basterfield before procurement, manufacture, or installation. E&OE.
