01 Product description and specification

Product description	Electric urn with thermostatic control for heating and dispensing water in catering and food service settings. The Basterfield E24111T Electric Hot Water Urn With Thermostat is a cost effective urn unit fitted with a thermostat reading 30 – 110C and a sight glass. The urn is designed to boil water speedily, suited to use in conference venues and food service establishments where on demand boiling water is needed. The unit is quick to boil – making it intended for dealing with sudden surges in demand. The sight glass allows a user to monitor the amount of water in the unit and easily refill to prevent running out of boiling water. The thermostat allows the ideal temperature to be set and maintained – thus ensuring an energy efficient hot water urn. The stainless steel AISI 304 construction ensures the unit is hygienic and easy to clean. The simple design ensures ease of maintenance and continued hygiene. A wide range of different capacity and power rating models allow for the suitable product to be selected. The hot water urn is manufactured in South Africa. Construction and features • A thermostat switch enabling you to set the temperature of the water and then maintain it while saving on electricity. • Positive action, easy to clean non-drip draw off tap with easily replaceable tap seat. • Insulated side carrying handles. • 1.2 meter flexible cord and three-pin plug.
