01 Product description and specification

Product description

The H72731 floor-mounted staining table provides a work area for laboratory staining and preparation. Dual downdraft ventilation connects to external extraction through two 150 mm diameter ducts with protective cowling.

The table is available in Grade 304 or Grade 316 stainless steel, with lengths of 1200, 1800 or 2400 mm. Overall width is 770 mm and height is 900 mm.

A continuous-flow laboratory trough has a waste outlet and overflow, while an outer trough with sparge system supports wash-down. Four coarse-perforation trays and one fine-perforation main work tray are provided. A recessed shroud allows foot space, and an access panel provides servicing access.

Confirm the water, waste and external extraction requirements when specifying the installation.
