01 Product description and specification

Product description	Grade 304 stainless steel carcass trolley with a tubular frame for transporting carcasses in meat processing areas. The Basterfield M30890 Carcass Trolley is a heavy-duty material handling unit manufactured for demanding commercial and industrial environments where durability, hygiene and reliable manoeuvrability are essential. Constructed from stainless steel Grade 304 with a robust 40 mm x 40 mm tubular frame, this trolley is designed to withstand rigorous daily use whilst offering excellent corrosion resistance and ease of cleaning. Its stainless steel construction makes it well suited to hygiene-sensitive applications, particularly in meat processing, food production, abattoirs, cold rooms and other washdown areas where cleanliness and long service life are critical. With overall dimensions of 1800 mm (L) x 750 mm (W) x 1900 mm (H), the M30890 provides a substantial framework for handling carcasses and similar suspended loads in production and processing environments. The unit is fitted with six wheels for enhanced load distribution and stability, with the middle wheels offset to allow one-hand rotation and improved steering performance in confined spaces. This design assists with directional control and ease of movement along processing lines or within storage and dispatch areas. An integral drip tray is incorporated to assist with the collection of liquid runoff, supporting cleaner floor conditions and improved workplace hygiene. Its stainless steel construction supports ease of sanitation and resistance to corrosion in wet operating conditions.
Short Form Specification	SPECIFICATION USE Use this description when specifying this product range. Basterfield M30890(1800x750x1900). Stainless Steel Carcass Trolley. Constructed from stainless steel Grade 304 with a robust 40 mm x 40 mm tubular frame, this trolley is designed to withstand rigorous daily use whilst offering excellent corrosion resistance and ease of cleaning. With overall dimensions of 1800 mm (L) x 750 mm (W) x 1900 mm (H), the M30890 provides a substantial framework for handling carcasses and similar suspended loads in production and processing environments.

02 Models and configurations

MODEL	DESCRIPTION	PUBLISHED CONFIGURATION
M30890(1800x750x1900)	Carcass Trolley	Standard configuration

03 Application information

Intended applications	Material Handling, Meat Processing
Industries	Meat & Poultry Processing

Typical lead time	10–15 working days
Warranty	12 months
